NAME: GWL-615 Toroidal Transformer Winding Machine

SPECIFICATION:Main technical parameters table: (Unit: mm)

Equipment model	GWL-615
Winding mode	Slider type
Finally complete the outside diameter	35-90mm
Minimum finished inside diameter	22mm
Maximum completion height	30mm
Suitable winding diameter range	0.15-0.5mm

GREWIN INDUSTRIAL GROUP CO.,LTD.

Add: The fourth floor A-A3 zone aviation business area,Dongli Distr,Tianjin,China.

Perimeter of magazine	630mm
Width of magazine	3-6mm
Maximum speed	700 RPM
Operating voltage	220V/50HZ
Overall dimension	650*500*650mm
Weight	110KG

FEATURES:

1. It adopts the side-sliding winding method, which is suitable for winding products with thin wire diameter and many turns, such as the primary coil of the transformer, the coil of the small mutual inductor, etc. It has the advantages of high winding speed, and is not easy to scratch the paint or break the wire.
2. Suitable for winding wires of various types, such as enameled copper wire, enameled aluminum wire, steel wire, heating wire, etc., suitable for coil processing of products in various industries
3. The machine head uses synchronous belt drive, which has the characteristics of low running noise, long life and maintenance-free
4. The wire storage ring is driven by a soft rubber wheel, which is not easy to slip and does not wear the wire storage ring, making the equipment more durable
5. The maximum winding speed can be set according to the wire diameter

6. Automatically rotate the wire arrangement function when arranging the wire. When making transformer products with more turns, the lead position is reserved
7. The maximum speed of wire storage and winding can be adjusted separately. When winding small wire diameter products, the winding speed cannot be too fast, which significantly improves production efficiency
8. Multiple wire storage and multiple winding can be set. For products with more turns that cannot be stored enough at one time, the winding can be completed at one time
9. The wire arrangement density (speed) can be automatically changed when running different programs. When winding products with multiple taps but different turns and the same wire arrangement angle/requirements, it can be automatically completed

APPLICATION:

Toroid Winding Machine is the best suited to toroidal inductor, toroidal transformers, toroidal current transformers, toroidal coil, toroid choke coil, power inductors, UPS inductor, converter inductor and heavy toroidal core etc.

PRACTICAL APPLICATION :

TRAINING CUSTOMER TO OPERATE WINDING MACHINE :

- 1.All service engineers with 10 years experience are gotten special technology training, who can deal with various breakdown problem.
- 2.Guide the user to use accurately and how to maintain the product.
Provide free consultation about production process technology of electronic products.
- 3.In order to guarantee the machine used normally, we'd have training on how to operate, use and maintain our product by English manual, video, guiding on line.

PACKAGING:

Packaging Material: Carton/Wooden case with foam inside.

1. General package(Paper carton or plastic bag): For small equipped parts for Toroidal Transformer Winding Machine , Package it with form and pack paper to guarantee unbroken during the transport.

2. Wooden case package: For larger scale Toroidal Winding machine ,we have special skilled carpenter, who would make the proper wooden case with exact thickness,density,length. The up arrow ↑marked on the outer wooden case. Buffer material would be put in the wooden case to prevent crack and shock.

FACTORY:

We-GREWIN INDUSTRIAL GROUP is expert in winding machines lines for 28Years. Our Grewin have ISO9001:2015,CE approvals,Machines'Patents,"high-tech enterprises"by the government.
